

# toys for technocrats, and some working folks too

*Finally, a present for you, too*

## Trackstick™ II Personal GPS Tracker

The Trackstick records its own location, time, date, speed, heading and altitude at preset intervals, in short, it can store months of travel information. The Trackstick is the perfect tool for people looking for a way to track anything that moves. Use it for recording the exact routes you take when hiking, biking, or vacationing. Record the location of everywhere you went, and import pictures and other information into Google™ Earth. Includes GPX photo stamping feature for adding your favorite photos to your own maps. Trackstick II will work anywhere on the planet Earth. [<http://earthproductsandmore.com>]

## Leica GRX1200 Pro sensor with AT504 antenna [GPS/GLONASS]

New York State Department of Transportation (NYS DOT) has expanded its highly successful NYS Spatial Reference Network (NYSNet) with 10 more CORS sites equipped with GRX1200 Pro dual-frequency, high precision GPS reference sensors and high precision AT504 choke-ring antennas. Currently NYSNet is actively used by NYS DOT regional survey crews as well as approximately 125 private survey and engineering companies.

## Trimble GX 3D Scanner—

perfect for all the heavy-duty scanning you have been planning to do.

## HiPer G series receiver system

Topcon Positioning Systems' (TPS) popular HiPer receiver series has been expanded to include two new digital design models. Offering either GPS-only or GPS plus GLONASS technology, the new precision RTK systems features high-performance digital UHF radio technology which has the advantages of digital signal processing while still offering compatibility with older UHF communication systems and receivers.

**Topcon PI-3000** Image Modeler Software captures “reality” in the field, enabling users to generate 3-D models quickly from digital images.

Anybody who can tell me what this “green bug” is good for can have it [the picture] for free.

## Classic Menu for Office 2007 v3.51

is an interface add-on developed by Addintools for Microsoft Office 2007. The software brings back the classic style of Microsoft Office

2003 interface while giving users all the new features of Microsoft Office 2007.
